MAPPING IN CUAJIMALPA, MÉXICO CITY FOR FEMALE SAFETY

Mexico

TASKS   INSTRUCTIONS   CONTRIBUTIONS

Beginner mappers - concentrate on mapping buildings. Choose ID Editor as your tool. Please use the AREA Tool to trace all buildings. Square all tracings using the right click, then square up tool. Tag the feature with ""building"" only. Save frequently.

Buildings: Please accurately outline all the buildings you can find. The outline should be for the full size of the building even if it is partly covered by trees in the imagery.

For square or rectangular buildings, after drawing the outline, use the 's' key in the web editor to "square" the corners. In the iD web editor, the first time you map a building you will use the "Building" category and then at the top of the list select "Building" again.

If you are a TeenMaptivist, don't forget to add a changeset comment stating what you did and include your chapter hashtag, #TeenMaptivists
